Precise
Accurate
Reliable

AprioMed

SeeStar® Guiding Device

- Visualize and adjust the planned CT-guided biopsy before entering the needle.
- Reduce the number of needle manipulations¹.
- Support the needle during superficial punctures.
- Maintain the direction of the needle during puncture.

SeeStar® aids the physician by producing an artifact in the CT image, indicating the intended needle path.

AprioMed provides tools that enable physicians to optimize precision and control during the most challenging procedures. For more information about AprioMed's Interventional Radiology products please visit www.apriomed.com.

Bonopty® Bone Biopsy System

SeeGrid® Position Indicator

Before using SeeStar® read the Instructions for Use which accompany the product. SeeStar® is a registered trademark of AprioMed AB, Uppsala, Sweden. SeeStar® is manufactured under one or more of the following patents: EP 1534153, AU 2003256201, SE 524 042. Other patents pending.
