Accurate
Reliable

AprioMed

SeeGrid® Position Indicator

- A marker for all procedures that require position information to be transferred from the CT image to the patient's skin.
- Increases position transfer accuracy.
- Good visibility in all x-ray based image modalities.

SeeGrid® is made from soft flexible plastic filled with barium to ensure good visibility in all x-ray based image modalities.

AprioMed provides tools that enable physicians to optimize precision and control during the most challenging procedures. For more information about AprioMed's Interventional Radiology products please visit www.apriomed.com.
